

## Investment Philosophy

Based on three core beliefs:

- Momentum is a significant source of alpha
- Inefficient response to change creates the opportunity
- Actively addressing risk retains alpha

## Investment Process

Our Informed Momentum™ approach combines stock selection, tailored risk management, and efficient implementation to effectively deliver the momentum premium and alpha for our clients.

## Investment Objective

To deliver consistent alpha by investing in non-US micro cap companies that correspond to the market capitalization range of the FTSE Global ex-US Micro Cap Index.

## Portfolio Managers

## About EAM

EAM Investors is solely focused on delivering alpha for clients in global equity markets. Our approach to investing leverages our collective insight within a systematic process designed to deliver consistent and predictable outcomes. We currently manage \$2.3 Billion on behalf of our clients.

**INSTITUTIONAL INVESTOR USE ONLY. Past performance does not ensure future results, and there is no assurance that the portfolios will achieve their investment objectives.**

Gross and net returns are presented net of brokerage commissions and include the reinvestment of income from interest and dividends as well as capital gains less applicable withholdings. The returns do not reflect the deduction of other taxes a typical investor may accrue or custodial fees. The U.S Dollar is the currency used to express performance. Net returns are net of the maximum annual management fee of 1.00%.

All periods greater than one year are annualized. Inception-To-Date returns for the EAM Non-US Micro Cap portfolio is from the period beginning June 1, 2014.

<sup>1</sup>The Linked Global ex-US Micro Cap Index represents the linked index returns of the Russell Global ex-US Micro Cap Index from June 1, 2014 through December 31, 2018 and the index returns of the FTSE Global ex-US Micro Cap Index effective January 1, 2019 and thereafter. The Russell Global ex-US Micro Cap Index was no longer supported effective December 31, 2018 and the FTSE Global ex-US Micro Cap Index is initiated effective January 1, 2019. The Adviser has linked the returns of these two indexes for comparison purposes because it believes that the linked return stream is the most appropriate broad-based securities indexing available to be used for comparative purposes given the investment strategy of the EAM Non-US Micro Cap Composite. The FTSE Global ex-US Micro Cap Index is a market-capitalization weighted index representing the performance of Micro cap stocks in Developed and Emerging markets (excluding the US). The FTSE Global ex-US Micro Cap index is constructed to represent the Micro-cap segment of the global equity market, excluding companies assigned to the United States. The indexes are unmanaged and cannot be invested in directly.

The performance of the Indexes reflects dividends net of foreign tax withholdings applicable to a typical foreign investor and capital gains but does not reflect the deduction of any investment management fees or other expenses or taxes. The indexes are unmanaged and cannot be invested in directly.

Under no circumstances does the information contained within represent a recommendation to buy or sell securities. The securities identified in the materials are used for illustrative purposes in the discussion of our investment philosophy and processes. We may or may not have held, currently hold, or will hold any of the securities.

The portfolios are actively managed and holdings are subject to change. We believe the information presented is reliable, but we do not guarantee its accuracy. The opinions expressed will evolve as future events unfold. The investment risk of the portfolios may be increased by the portfolios' ability to invest in smaller company stocks, and IPOs. Investing in growth stocks involves certain risks, in part, because the value of securities is based upon future expectations that may or may not be met. Small company stocks are generally riskier than large company stocks due to greater volatility and less liquidity.
