The EAM Non-US Small Cap strategy returned 4.67% (Net of fees) in Q4, underperforming the MSCI ACWI ex-US Small Cap Index by 864 basis points. The hardest hit areas from the previous market drawdown sharply reversed course in the period, making for a challenging environment for our investment approach. Not surprisingly, our inherent exposure to momentum was a key detractor for our strategy in the quarter, while other factor headwinds (relative country positioning, under-exposure to value) also hurt.

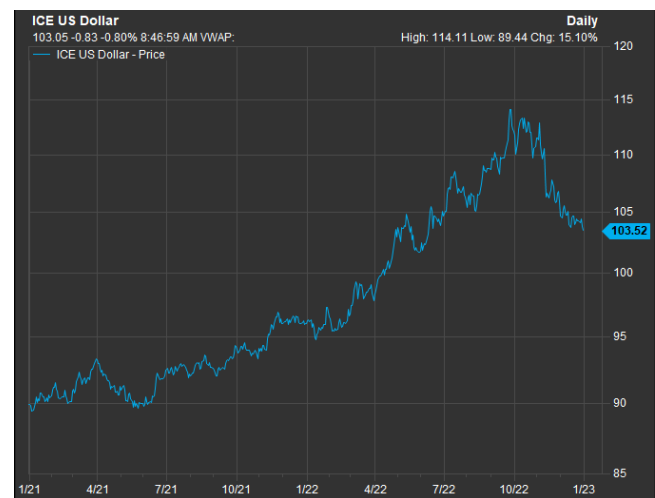

### Market Environment

Global equity markets rebounded in the fourth quarter, making up some ground after a painful year. Signs that inflation may have peaked fueled optimism that the pace of interest rates hikes could slow, sending markets higher in Q4. European countries were among the best performing in the period despite central banks reiterating plans for tight monetary policy. Asian-Pacific countries also sharply reversed course in the quarter, driven by the prospect of improved US/China relations as well as the relaxation of China's zero-Covid policy. Currency gains against the US dollar halted a 2-year surge in US dollar strength, helping to boost emerging markets. The ICE U.S. Dollar Index (DX), a gauge of the US dollar's strength versus a basket of six major currencies, declined 7.8% in Q4 after being up 24.7% in the prior 7 quarters.

#### Volatility in rates signaled the level of uncertainty in Q4

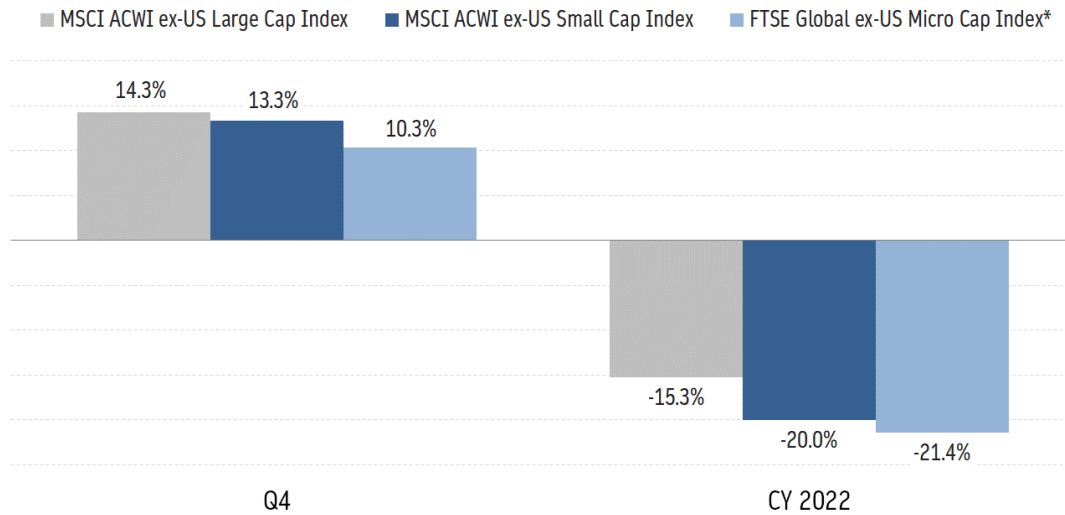

#### The US Dollar receded after a 2-year surge

All size categories jumped in Q4, with larger market cap stocks outpacing smaller market caps. November saw the biggest surge for non-US equities with large cap leading the way, gaining 12.2%, and micro cap lagging, up only 8.5%. Year-to-date, large cap has also held in best but is still down 15.3%, while non-US small cap fell 20.0%.

Despite a positive Q4, Non-US equities logged their worst year since 2008

Within the MSCI ACWI ex-US Small Cap Index, the hardest hit countries in the previous drawdown made the biggest gains in Q4. After being down 40% in the prior three quarters, Europe surged to be the best performing region, up 21.6% in Q4. Finland (+27.5%), Italy (+26.9%), and Denmark (+24.7%) were the best performers in the quarter. Elsewhere, Asia-Pacific countries rallied particularly in November and December, with China (+21.4%) and Korea (+19.2%) making a dramatic pivot. On the downside, Israel (-5.8%), Brazil (-4.0%), and India (-1.8%) were notable underperformers for the quarter.

MSCI ACWI ex-US Small Cap Index: The worst performers in the downturn became the leaders in Q4

	YTD thru Q3	Q4	Q4 Avg Weight	Q4 Contribution	CY 2022
Europe	-39.6%	21.6%	33.59	7.19	-26.6%

<b>Total</b>	<b>-29.4%</b>	<b>13.3%</b>			<b>-20.0%</b>

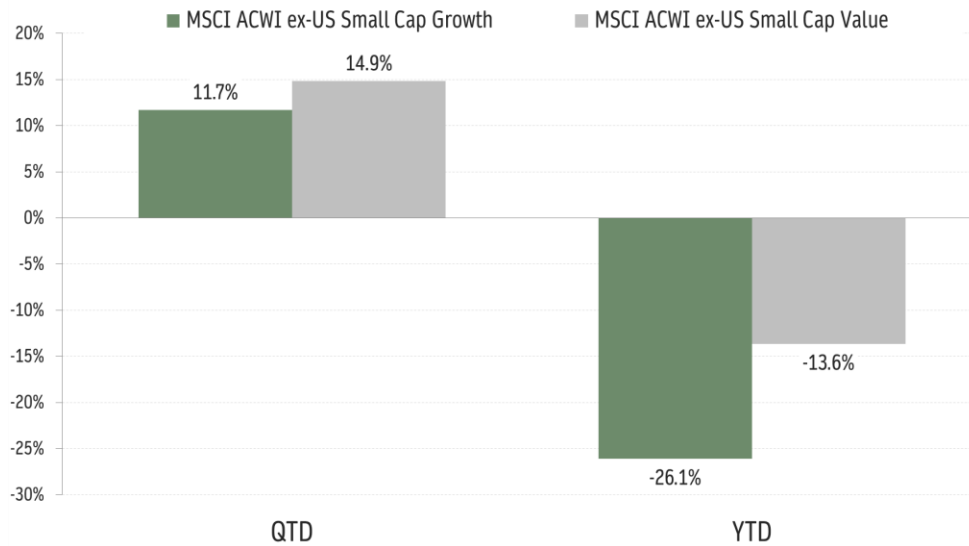

Nearly all sectors posted double digit gains in the fourth quarter, with the economically sensitive financials (+19.2%), industrials (+15.2%), and consumer staples (+13.8%) sectors leading the way. On the other side, real estate (+9.1%) was the biggest laggard as higher interest rates are a headwind for the sector. For the year, energy was the only sector to post a positive return, up 26.9%. Otherwise, utilities (-8.1%) and financials (-10.0%) have held in better this year, while technology, health care, and communication services are each down over 31%.

MSCI ACWI ex-US Small Cap Index: Economically sensitive sectors led the gains in Q4 with financials on top

	YTD thru Q3	Q4	Q4 Avg Weight	Q4 Contribution	CY 2022
Financials	-24.5%	19.2%	11.17	2.12	-10.0%

Value outpaced growth in Q4 and held in significantly better on the year as classic growth sectors (technology, health care, and communication services) suffered most in 2022. The MSCI ACWI ex-US Small Cap Growth Index lost 26.1% this year, underperforming its value counterpart by over 12 percentage points!

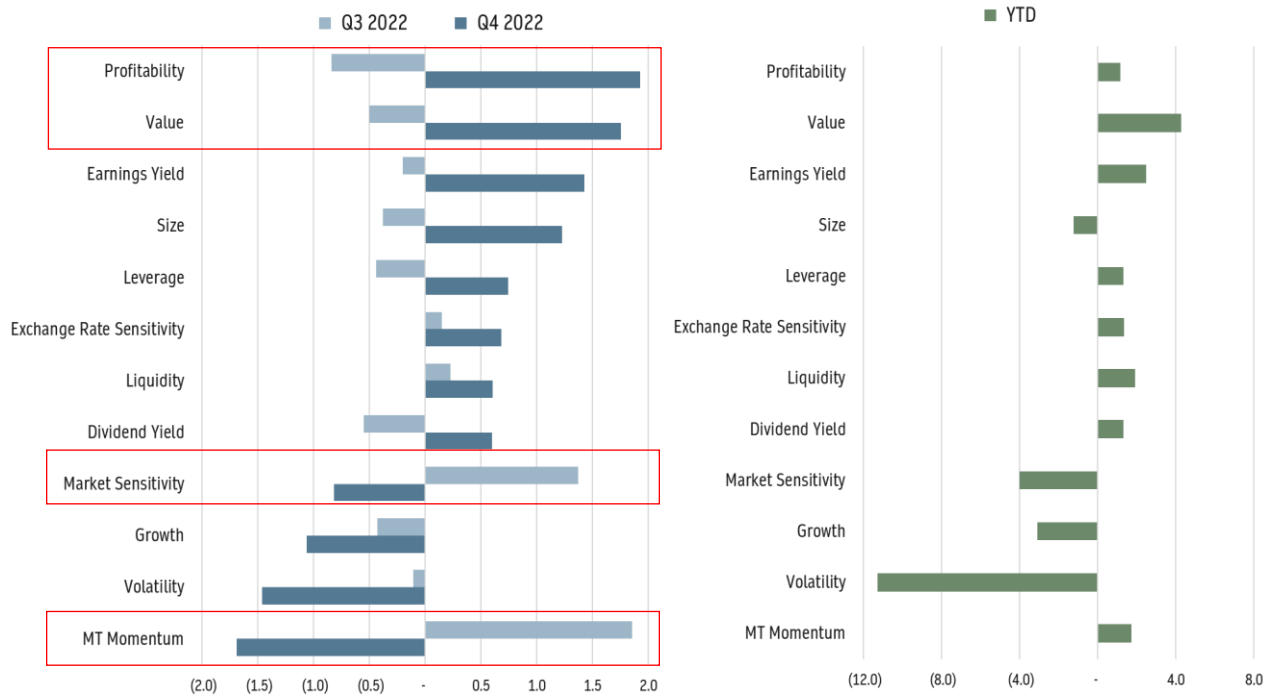

Value led in Q4 and massively outperformed in 2022

Source: EAM Investors, MSCI as of December 31, 2022

Axioma factor returns quarter over quarter show the nature of the dramatic reversal across global equity markets in Q4. Short-term trend reversals in the quarter resulted in momentum being the worst performing factor for the period, while volatility and growth also underperformed. Gains in Q4 were led by profitability and value, which were among the biggest laggards in the prior quarter.

Sharp quarter-over-quarter reversal in factor leadership with momentum going from best to worst

Source: Axioma World Wide Medium-Horizon Fundamental Equity Model factor returns as of December 31, 2022.

Underperformance of the momentum factor in Q4 had a significant impact on our Informed Momentum approach. Within the MSCI ACWI ex-US Small Cap Index, the lowest momentum stocks (bottom quintile) outperformed the highest by over 900 basis points in the quarter.

The lowest momentum stocks significantly outperformed in Q4

### EAM Non-US Small Cap: 4<sup>th</sup> Quarter Performance & Risk Attribution

The EAM Non-US Small Cap strategy returned 4.67% (Net of fees) in Q4, underperforming the MSCI ACWI ex-US Small Cap Index by 864 basis points.

Risk-based attribution shows that factor effects drove our underperformance in the quarter. Our inherent exposure to medium-term momentum was a key headwind in the period. Additionally, relative country positioning detracted, mostly due to being overweight Brazil. On the other side, we benefitted from relative industry weights (underweight to real estate, overweight to energy) and exposure to profitability.

#### Q4'22 Axioma Risk Attribution: EAM Non-US Small Cap Composite vs. MSCI ACWI ex-US Small Cap Index

Calculated using end-of-day pricing, therefore may not exactly equal actual composite return.  
 Source: EAM Investors LLC; Axioma World-Wide Equity Fundamental Risk Model; MSCI; FactSet Research Systems Inc.

Attribution by sector shows negative stock selection was the primary cause of our underperformance, particularly in information technology, consumer discretionary, and industrials. These negative effects were partially offset by positive stock selection in health care and communication services, as well as the positive allocation effect of being underweight real estate.

Attribution by country shows both negative stock selection and allocation effects caused us to underperform in the quarter. Negative stock selection in Japan and Australia detracted most, while our holdings in Singapore and Ireland added value. From an allocation perspective, our overweight to Brazil was the largest detractor, while we benefitted from having no exposure to Israel.

### EAM Non-US Small Cap: Calendar Year 2022 Performance & Risk Attribution

The EAM Non-US Small Cap strategy returned -26.00% (Net of fees) in calendar year 2022, underperforming the MSCI ACWI ex-US Small Cap Index by 603 basis points.

Risk-based attribution shows that factor effects drove our underperformance in the period, while we benefitted from positive stock selection. Exposure to volatility had the single largest impact, while relative country positioning (underweight to Japan and China, overweight to Brazil), and under-exposure to value further detracted. On the other side, we benefitted from relative industry positioning (overweight to energy) and exposure to medium-term momentum.

#### CY 2022 Axioma Risk Attribution: EAM Non-US Small Cap Composite vs. MSCI ACWI ex-US Small Cap Index

Calculated using end-of-day pricing, therefore may not exactly equal actual composite return.

Source: EAM Investors LLC; Axioma World-Wide Equity Fundamental Risk Model; MSCI; FactSet Research Systems Inc.

Attribution by sector shows negative stock selection drove our underperformance, while allocation effects were additive. Stock selection in consumer discretionary, materials, and financials detracted most, offset partially by positive stock selection in energy. From an allocation perspective, we benefitted most from being overweight to energy.

Attribution by country shows we underperformed due to both negative allocation and stock selection effects. Being overweight to Brazil and Korea, and underweight to Japan and China were the largest drivers of negative allocation effect. From a stock selection standpoint, our holdings in Japan detracted most, while we benefitted from positive stock selection in Canada and Norway.

All periods greater than one year are annualized. Please see the "Important Disclosures" page for detailed performance disclosures.

\*Inception-To-Date returns are from the period beginning October 2, 2007.

## Important Disclosures:

### **Past performance does not ensure future results, and there is no assurance that the portfolios will achieve their investment objectives.**

Gross and net composite returns are presented net of brokerage commissions and include income from interest and dividends as well as capital gains less applicable withholdings. The returns do not reflect the deduction of other taxes a typical investor may accrue or custodial fees. The U.S Dollar is the currency used to express performance. All periods greater than one year are annualized.

#### **EAM Small Cap**

The inception date for the EAM Small Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.75%. The Russell 2000 Index consists of the smallest 2,000 securities in the Russell 3000 Index, representing approximately 10% of the Russell 3000 total market capitalization. The Russell 2000 Value Index (R2KVI) measures the performance of those Russell 2000 companies with relatively lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Index and the Russell 2000 Value Index are being presented for informational purposes only. The Russell 2000 Growth Index (R2KGI) measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2000 Growth Index has been chosen as a benchmark to the EAM Small Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

#### **EAM Micro Cap**

The inception date for the EAM Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.80%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Growth Index has been chosen as a benchmark to the EAM Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

#### **EAM Ultra Micro Cap**

The inception date for the EAM Ultra Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.80%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Growth Index has been chosen as a benchmark to the EAM Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

#### **EAM Non-US Small Cap**

The inception date for the EAM Non-US Small Cap composite is May 1, 2011. Net returns are net of the maximum annual management fee of 0.80%. The MSCI ACWI ex-US Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets excluding the United States. The MSCI ACWI ex-US Small Cap Index has been chosen as a benchmark to the EAM Non-US Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI ex-US Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 22 of 23 DM countries (excluding the US) and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI ex-US Small Cap Growth Index and the MSCI ACWI ex-US Small Cap Value Index are being presented for informational purposes only.

#### **EAM Emerging Markets Small Cap**

The inception date for the EAM Emerging Markets Small Cap composite is April 1, 2012. Net returns are net of the maximum annual management fee of 0.85%. The MSCI Emerging Markets Small Cap Index includes small cap representation across 25 Emerging Markets countries (EM) and is designed to measure small cap equity market performance in the global emerging markets. The MSCI Emerging Markets Small Cap Index has been chosen as a benchmark to the EAM Emerging Markets Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI Emerging Markets Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 25 EM countries. The MSCI Emerging Markets Value Index captures small cap securities exhibiting value style characteristics across 25 EM countries. The MSCI Emerging Markets Small Cap Growth Index and the MSCI Emerging Markets Small Cap Value Index are being presented for informational purposes only.

#### **EAM Non-US Micro Cap**

The inception date for the EAM Non-US Micro Cap composite is June 1, 2014. Net returns are net of the maximum annual management fee of 1.00%. The Linked Global ex-US Micro Cap Index represents the linked index returns of the Russell Global ex-US Micro Cap Index from June 1, 2014 through December 31, 2018 and the index returns of the FTSE Global ex-US Micro Cap Index effective January 1, 2019 and thereafter. The Russell Global ex-US Micro Cap Index was no longer supported effective December 31, 2018 and the FTSE Global ex-US Micro Cap Index is initiated effective January 1, 2019. The Adviser has linked the returns of these two indexes for comparison purposes because it believes that the linked return stream is the most appropriate broad-based securities indexing available to be used for comparative purposes given the investment strategy of the EAM Non-US Micro Cap Composite. The FTSE Global ex-US Micro Cap Index is a market-capitalization weighted index representing the performance of Micro cap stocks in Developed and Emerging markets (excluding the US). The FTSE Global ex-US Micro Cap index is constructed to represent the Micro-cap segment of the global equity market, excluding companies assigned to the United States.

#### **EAM Global Opportunities**

The inception date for the EAM Global Opportunities composite is July 1, 2017. Net returns are net of the maximum annual management fee of 0.75% for the EAM Global Opportunities Strategy. The MSCI ACWI Small Cap Index captures small cap representation across 23 Developed Markets (DM) countries and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets. The MSCI ACWI Small Cap Index has been chosen as a benchmark to the EAM Global Opportunities strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI Small Cap Growth Index captures small-cap securities exhibiting overall growth style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI Small Cap Value Index and the MSCI ACWI Small Cap Growth Index are being presented for informational purposes only.

The performance of the Indexes reflects dividends net of foreign tax withholdings applicable to a typical foreign investor and capital gains but does not reflect the deduction of any investment management fees or other expenses or taxes. The indexes are unmanaged and cannot be invested in directly.

Under no circumstances does the information contained within represent a recommendation to buy or sell securities. The securities identified in the materials are used for illustrative purposes in the discussion of our investment philosophy and processes. We may or may not have held, currently hold, or will hold any of the securities.

The portfolio(s) are actively managed and holdings are subject to change. We believe the information presented is reliable, but we do not guarantee its accuracy. The opinions expressed will evolve as future events unfold. The investment risk of the portfolio(s) may be increased by the portfolios' ability to invest in smaller company stocks, and IPOs. Investing in growth stocks involves certain risks, in part, because the value of securities is based upon future expectations that may or may not be met. Small company stocks are generally riskier than large company stocks due to greater volatility and less liquidity.
