<sup>\*</sup>Inception-To-Date returns are from the period beginning April 1, 2012. All returns as of June 30, 2023. Please see important disclosures at the end of this document. Source: EAM Investors, MSCI.

The EAM Emerging Markets Small Cap strategy returned +10.54% (net of fees) in Q2, outperforming the MSCI EM Small Cap Index by 415 basis points. Positive stock selection drove the strategy's outperformance in the quarter, particularly within Korea and Taiwan. From a factor standpoint, relative industry positioning was further additive (overweight industrials and consumer discretionary) as was exposure to medium-term momentum.

#### Market Environment

Emerging markets (EM) small cap stocks advanced higher in Q2, to close a strong first half of 2023. Gains came despite global equities coming under pressure in the first part of the quarter amid rising interest rates and concerns around global growth. EM small cap held in, buoyed by strength in India and Taiwan. India was among the best performing markets in Q2, up 18% in the EM small cap index, driven by positive economic data. Taiwan was boosted by strong gains in the technology sector in the quarter. The announcement of Nvidia's earnings in May triggered enthusiasm for AI-related stocks and chipmakers, lifting technology shares globally. The rally broadened out in June, supported by moderating inflation and better-than-expected economic data.

The MSCI EM Small Cap Index was a standout performer in Q2, gaining 6.4%, 549 basis points ahead of its mid/large cap counterpart. Small cap benefitted most in the quarter from higher exposure to India, while large cap was weighed down by its hefty weight in China (>30%). China continues to be among the worst performers in the index amid concerns of an anemic economic recovery and further legislative pressure applied by the US.

## Emerging markets small cap led gains in Q2

The Axioma World-Wide Equity Risk Model's size factor was the top performer in Q2, followed by earnings yield and value. Market sensitivity (Beta) and volatility were also positive in the quarter, having notable outperformance in the June rally. On the other side, profitability, exchange rate sensitivity and dividend yield lagged in Q2.

Year-to-date, size is far and away the best performing factor, while market sensitivity and liquidity have also outperformed. Exchange rate sensitivity and profitability have been the laggards so far this year. Additionally, the momentum factor has made a comeback after its crash in January, however, still lags year-to-date.

The size factor is the top performer in Q2 and YTD, Momentum has made a comeback from the January crash

Axioma World-Wide Equity Risk Model Factor Returns

A deeper look at the types of stocks driving performance in the MSCI EM Small Cap Index shows the largest market cap stocks (>\$2 Billion) did best in Q2, up 12.5%. Additionally, stocks with higher ROE and higher momentum outperformed, while the lowest Beta stocks and non-earners lagged. In contrast to developed markets, higher momentum stocks have outperformed so far this year in EM small cap, with strength in Korea, India, and Taiwan contributing most.

In EM Small Cap, high momentum stocks outperformed in Q2, as did stocks with higher ROE and higher P/E

In the MSCI EM Small Cap Index, Brazil was the top performing country, up 29.5% in Q2, driven by better-than-expected GDP data and easing fiscal policy concerns. India also benefitted from positive economic data in the quarter to gain 18.1%. Taiwan was among the better performing countries driven by gains in technology stocks. On the downside, China continues to be among the worst performers in the index amid concerns of an anemic economic recovery and further legislative pressure applied by the US.

MSCI EM Small Cap Index: Brazil and India posted strong gains in Q2, China lagged

Sector performance month-over-month shows key reversals that took place in the quarter. Financials sold off late in Q1 due to banking sector turmoil, only to rally back as the best performer in April. After being the worst performer in April, AI-fueled enthusiasm sent technology shares higher in May. Markets were full steam ahead in June as moderating inflation and resilient economic data sent stocks higher in the month. Materials, financials, and industrials were the best performers in the June rally, while defensive areas lagged. The quarter ended with financials and industrials on top, while energy and consumer staples underperformed.

MSCI EM Small Cap Index: Financials and industrials ended the guarter on top

# EAM Emerging Markets Small Cap: 2<sup>nd</sup> Quarter Performance & Risk Attribution

The EAM Emerging Markets Small Cap strategy returned +10.54% (net of fees) in Q2, outperforming the MSCI EM Small Cap Index by 415 basis points.

Risk-based attribution shows that the strategy benefitted most from positive stock selection in the quarter, particularly within Korea and Taiwan. Factor effects further added value, with relative industry positioning (overweight to industrials and consumer discretionary) and momentum exposure being the largest contributors. On the other side, relative country positioning detracted (underweight to India and Brazil), as did under-exposure to the value factor.

# Q2'23 Axioma Risk Attribution: EAM Emerging Markets Small Cap Composite vs. MSCI EM Small Cap Index

Calculated using end-of-day pricing, therefore may not exactly equal actual composite return.

Source: EAM Investors LLC; Axioma World-Wide Equity Fundamental Risk Model; MSCI; FactSet Research Systems Inc.

Performance attribution by sector shows the strategy's outperformance in the quarter was driven by positive stock selection in industrials, technology, and materials. Allocation effects were further additive, with an underweight to real estate and overweight to industrials being the largest contributors. On the other side, stock selection in consumer staples and energy detracted.

Attribution by country shows positive stock selection in Korea and Taiwan were the largest contributors to the strategy's outperformance. The strategy also benefitted from being overweight to Taiwan and Greece. This was offset by negative allocation effects from being underweight to Brazil and Saudi Arabia, as well as negative stock selection in India.

All periods greater than one year are annualized. Please see the "Important Disclosures" page for detailed performance disclosures. \*Inception-To-Date returns are from the period beginning October 2, 2007.

#### **Important Disclosures:**

Past performance does not ensure future results, and there is no assurance that the portfolios will achieve their investment objectives.

Gross and net composite returns are presented net of brokerage commissions and include income from interest and dividends as well as capital gains less applicable withholdings. The returns do not reflect the deduction of other taxes a typical investor may accrue or custodial fees. The U.S Dollar is the currency used to express performance. All periods greater than one year are annualized.

#### **EAM US Small Cap**

The inception date for the EAM Small Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.75%. The Russell 2000 Index consists of the smallest 2,000 securities in the Russell 3000 Index, representing approximately 10% of the Russell 3000 total market capitalization. The Russell 2000 Value Index (R2KVI) measures the performance of those Russell 2000 companies with relatively lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Index and the Russell 2000 Value Index are being presented for informational purposes only. The Russell 2000 Growth Index (R2KGI) measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2000 Growth Index has been chosen as a benchmark to the EAM Small Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

#### **EAM US Micro Cap**

The inception date for the EAM Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.80%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Growth Index has been chosen as a benchmark to the EAM Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

#### **EAM US Ultra Micro Cap**

The inception date for the EAM Ultra Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.80%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Growth Index has been chosen as a benchmark to the EAM Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

#### **EAM Non-US Small Cap**

The inception date for the EAM Non-US Small Cap composite is May 1, 2011. Net returns are net of the maximum annual management fee of 0.80%. The MSCI ACWI ex-US Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets excluding the United States. The MSCI ACWI ex-US Small Cap Index has been chosen as a benchmark to the EAM Non-US Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI ex-US Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 22 of 23 DM countries (excluding the US) and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI ex-US Small Cap Growth Index and the MSCI ACWI ex-US Small Cap Value Index are being presented for informational purposes only.

#### **EAM Emerging Markets Small Cap**

The inception date for the EAM Emerging Markets Small Cap composite is April 1, 2012. Net returns are net of the maximum annual management fee of 0.85%. The MSCI Emerging Markets Small Cap Index includes small cap representation across 25 Emerging Markets countries (EM) and is designed to measure small cap equity market performance in the global emerging markets. The MSCI Emerging Markets Small Cap Index has been chosen as a benchmark to the EAM Emerging Markets Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI Emerging Markets Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 25 EM countries. The MSCI Emerging Markets Value Index captures small cap securities exhibiting value style characteristics across 25 EM countries. The MSCI Emerging Markets Small Cap Growth Index and the MSCI Emerging Markets Small Cap Value Index are being presented for informational purposes only.

#### **EAM Non-US Micro Cap**

The inception date for the EAM Non-US Micro Cap composite is June 1, 2014. Net returns are net of the maximum annual management fee of 1.00%. The Linked Global ex-US Micro Cap Index represents the linked index returns of the Russell Global ex-US Micro Cap Index from June 1, 2014 through December 31, 2018 and the index returns of the FTSE Global ex-US Micro Cap Index effective January 1, 2019 and thereafter. The Russell Global ex-US Micro Cap Index was no longer supported effective December 31, 2018 and the FTSE Global ex-US Micro Cap Index is initiated effective January 1, 2019. The Adviser has linked the returns of these two indexes for comparison purposes because it believes that the linked return stream is the most appropriate broad-based securities indexing available to be used for comparative purposes given the investment strategy of the EAM Non-US Micro Cap Composite. The FTSE Global ex-US Micro Cap Index is a market-capitalization weighted index representing the performance of Micro cap stocks in Developed and Emerging markets (excluding the US). The FTSE Global ex-US Micro Cap index is constructed to represent the Micro-cap segment of the global equity market, excluding companies assigned to the United States.

#### **EAM Global Opportunities**

The inception date for the EAM Global Opportunities composite is July 1, 2017. Net returns are net of the maximum annual management fee of 0.75% for the EAM Global Opportunities Strategy. The MSCI ACWI Small Cap Index captures small cap representation across 23 Developed Markets (DM) countries and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets. The MSCI ACWI Small Cap Index has been chosen as a benchmark to the EAM Global Opportunities strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI Small Cap Growth Index captures small-cap securities exhibiting overall growth style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI Small Cap Value Index and the MSCI ACWI Small Cap Growth Index are being presented for informational purposes only.

The performance of the Indexes reflects dividends net of foreign tax withholdings applicable to a typical foreign investor and capital gains but does not reflect the deduction of any investment management fees or other expenses or taxes. The indexes are unmanaged and cannot be invested in directly.

Under no circumstances does the information contained within represent a recommendation to buy or sell securities. The securities identified in the materials are used for illustrative purposes in the discussion of our investment philosophy and processes. We may or may not have held, currently hold, or will hold any of the securities.

The portfolio(s) are actively managed and holdings are subject to change. We believe the information presented is reliable, but we do not guarantee its accuracy. The opinions expressed will evolve as future events unfold. The investment risk of the portfolio(s) may be increased by the portfolios' ability to invest in smaller company stocks, and IPOs. Investing in growth stocks involves certain risks, in part, because the value of securities is based upon future expectations that may or may not be met. Small company stocks are generally riskier than large company stocks due to greater volatility and less liquidity.
