*Inception-To-Date returns are from the period beginning October 2, 2007. All returns as of June 30, 2023. Please see important disclosures at the end of this document. Source: EAM Investors, FTSE Russell.

The EAM US Ultra Micro Cap strategy returned 4.32% (net of fees) in Q2 2023, underperforming the Russell Microcap Growth Index by 203 basis points and underperforming the Russell Microcap Index by 97 basis points.

The strategy's underperformance versus the growth benchmark was driven by negative stock selection in Health Care, coming almost entirely from not owning three stocks in the index (RXDX, IMGN, PRTA). This was cushioned by positive effects from the strategy's exposure to the Momentum factor which made a comeback in Q2.

Market Environment

US equity markets posted strong gains in Q2 with large cap leading the way. Mega cap technology companies have powered large cap's outperformance so far this year. In the Russell 1000 Index, the technology sector was up 17% in Q2 and has soared 44% this year. The announcement of Nvidia's earnings in late May triggered enthusiasm in AI-related stocks and chipmakers, lifting technology shares down the market cap spectrum as well.

The Russell Microcap Index advanced 5.3% in the quarter with nearly all of its gains coming in June. Risk-on sentiment in June came as the Fed paused interest rate hikes as expected. Additionally, resilient economic data and slowing inflation indicated that the US may have staved off a recession in the near-term.

A strong quarter for US equities, led by Large Cap

■ Russell 1000® Index ■ Russell Midcap® Index ■ Russell 2000® Index ■ Russell Microcap® Index

Risk-on sentiment in the quarter resulted in Market Sensitivity being the best performing factor for US equity stocks in Q2, followed by Size and Earnings Yield. Additionally, the Momentum factor has made a notable comeback after its significant crash in January.

Market Sensitivity (Beta) is the top performer in Q2 and YTD, Momentum made a comeback from the January crash

Axioma US Equity Risk Model Factor Returns

A deeper look at the types of stocks driving the performance of the Russell Microcap Index confirms signs of bullish sentiment during the quarter, given the 'low quality' nature of the leaders. Notably, stocks with negative earnings growth, low ROE and non-earners significantly outperformed, while the lowest Beta stocks lagged. High momentum stocks outperformed in Q2 but still lagged lower momentum stocks (Q4). Year-to-date, the lowest momentum stocks have outperformed in micro cap, up 6.9%, besting high momentum stocks by 437 basis points.

In Micro Cap, high momentum stocks outperformed, but still lagged lower momentum stocks

Q2 Performance Drivers within the Russell Microcap Index

Looking at sector performance month-over-month shows key reversals that took place in the quarter. Investors took on more defensive positioning in April amid fears of a slowdown in global growth and the overhang of banking sector turmoil. In micro cap, technology sank 12% in April after being the high-flyer in the previous quarter. At the same time, after underperforming in Q1, health care staged a turnaround as the best performing sector in April, up 5.4%.

May was a tale of two markets – technology stocks and everything else. Technology stocks were up double digits in May on the announcement of Nvidia’s earnings, which triggered enthusiasm for AI-related stocks and chipmakers.

Markets were full steam ahead in June. The Fed’s anticipated interest rate pause, as well as moderating inflation and resilient economic data, sent markets higher in the month. After underperforming earlier in the quarter, industrials, energy, and consumer discretionary were the best performing sectors in June, up double-digits, while defensive sectors lagged.

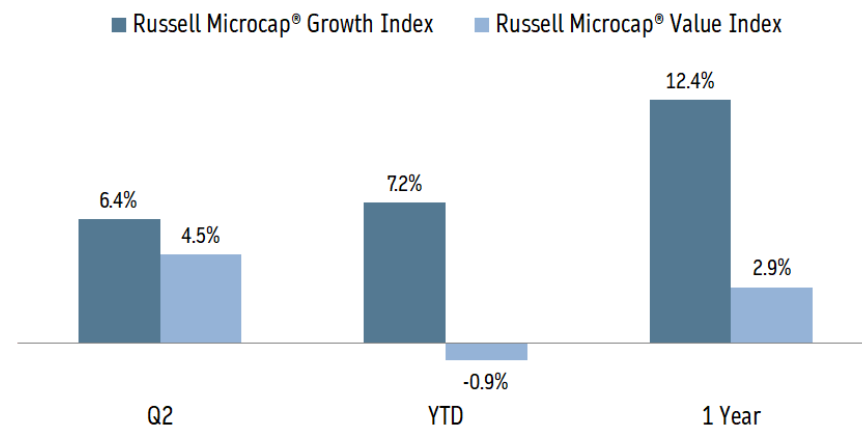

Health Care, Industrials, and Technology fueled gains in micro cap in Q2

Russell Microcap Index Returns

	Q2	June	May	April	Q1
Health Care	11.92	1.87	4.20	5.44	(6.40)
Industrials	8.23	12.84	2.00	(5.90)	3.41
Information Technology	6.86	4.36	16.36	(12.13)	8.61
Consumer Discretionary	4.05	12.02	(4.58)	(2.47)	5.12
Energy	3.87	12.59	(3.85)	(4.05)	1.16
Real Estate	3.27	6.29	0.32	(3.16)	(4.54)
Consumer Staples	(0.31)	2.62	(2.73)	(0.13)	(9.78)
Financials	(2.18)	7.06	(3.26)	(5.56)	(11.24)
Utilities	(2.70)	1.82	0.44	(4.85)	3.18
Communication Services	(3.52)	4.05	(2.77)	(4.63)	0.43
Materials	(3.78)	9.61	(6.86)	(5.75)	4.41
Total Return	5.29	6.59	1.41	(2.59)	(2.83)

From a style standpoint, growth led across all size segments. This was most pronounced in large cap, where growth (+12.8%) outperformed value by 874 basis points for the quarter and is ahead by over 23 percentage points year-to-date (+29.0% vs. +5.1%). Within micro cap, the Russell Microcap Growth Index gained 6.4% in Q2, 181 basis points ahead of its value counterpart. Health care’s gains (+12.9%) contributed most to growth’s outperformance. Year-to-date, the Russell Microcap Growth Index is up 7.2%, outperforming the Russell Microcap Value Index by 802 basis points.

Growth’s lead over value widened in Q2

EAM US Ultra Micro Cap: 2nd Quarter Performance & Risk Attribution

The EAM US Ultra Micro Cap strategy returned 4.32% (net of fees) in Q2 2023, underperforming the Russell Microcap Growth Index by 203 basis points.

Performance attribution shows negative stock selection in health care was the most significant detractor in the quarter. This was almost entirely due to the strategy not owning three biotechnology stocks (RXDX, IMGN, PRTA) that have significant weights in the index. Allocation effects further detracted due to an underweight to health care and overweight to consumer discretionary and communication services. On the other side, the strategy benefitted from positive stock selection in technology, communication services and industrials.

Risk-based attribution also shows stock selection in health care was the primary driver of underperformance. Factor effects were additive with exposure to momentum and market sensitivity (Beta) adding the most value in the quarter.

All periods greater than one year are annualized.

EAM US Small Cap

The inception date for the EAM US Small Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.75%. The Russell 2000 Index consists of the smallest 2,000 securities in the Russell 3000 Index, representing approximately 10% of the Russell 3000 total market capitalization. The Russell 2000 Value Index (R2KVI) measures the performance of those Russell 2000 companies with relatively lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Index and the Russell 2000 Value Index are being presented for informational purposes only. The Russell 2000 Growth Index (R2KGI) measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2000 Growth Index has been chosen as a benchmark to the EAM US Small Cap Growth composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

EAM US Micro Cap

The inception date for the EAM US Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.80%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Growth Index has been chosen as a benchmark to the EAM US Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

EAM US Ultra Micro Cap

The inception date for the EAM US Ultra Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.80%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Growth Index has been chosen as a benchmark to the EAM US Ultra Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

EAM Non-US Small Cap

The inception date for the EAM Non-US Small Cap composite is May 1, 2011. Net returns are net of the maximum annual management fee of 0.80%. The MSCI ACWI ex-US Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets excluding the United States. The MSCI ACWI ex-US Small Cap Index has been chosen as a benchmark to the EAM Non-US Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI ex-US Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 22 of 23 DM countries (excluding the US) and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI ex-US Small Cap Growth Index and the MSCI ACWI ex-US Small Cap Value Index are being presented for informational purposes only.

EAM Emerging Markets Small Cap

The inception date for the EAM Emerging Markets Small Cap composite is April 1, 2012. Net returns are net of the maximum annual management fee of 0.85%. The MSCI Emerging Markets Small Cap Index includes small cap representation across 25 Emerging Markets countries (EM) and is designed to measure small cap equity market performance in the global emerging markets. The MSCI Emerging Markets Small Cap Index has been chosen as a benchmark to the EAM Emerging Markets Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI Emerging Markets Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 25 EM countries. The MSCI Emerging Markets Value Index captures small cap securities exhibiting value style characteristics across 25 EM countries. The MSCI Emerging Markets Small Cap Growth Index and the MSCI Emerging Markets Small Cap Value Index are being presented for informational purposes only.

EAM Non-US Micro Cap

The inception date for the EAM Non-US Micro Cap composite is June 1, 2014. Net returns are net of the maximum annual management fee of 1.00%. The Linked Global ex-US Micro Cap Index represents the linked index returns of the Russell Global ex-US Micro Cap Index from June 1, 2014 through December 31, 2018 and the index returns of the FTSE Global ex-US Micro Cap Index effective January 1, 2019 and thereafter. The Russell Global ex-US Micro Cap Index was no longer supported effective December 31, 2018 and the FTSE Global ex-US Micro Cap Index is initiated effective January 1, 2019. The Adviser has linked the returns of these two indexes for comparison purposes because it believes that the linked return stream is the most appropriate broad-based securities indexing available to be used for comparative purposes given the investment strategy of the EAM Non-US Micro Cap Composite. The FTSE Global ex-US Micro Cap Index is a market-capitalization weighted index representing the performance of Micro cap stocks in Developed and Emerging markets (excluding the US). The FTSE Global ex-US Micro Cap index is constructed to represent the Micro-cap segment of the global equity market, excluding companies assigned to the United States.

EAM Global Opportunities

The inception date for the EAM Global Opportunities composite is July 1, 2017. Net returns are net of the maximum annual management fee of 0.75% for the EAM Global Opportunities Strategy. The MSCI ACWI Small Cap Index captures small cap representation across 23 Developed Markets (DM) countries and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets. The MSCI ACWI Small Cap Index has been chosen as a benchmark to the EAM Global Opportunities strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI Small Cap Growth Index captures small-cap securities exhibiting overall growth style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI Small Cap Value Index and the MSCI ACWI Small Cap Growth Index are being presented for informational purposes only.
