*Inception-To-Date returns are from the period beginning April 1, 2012. All returns as of June 30, 2024. Please see important disclosures at the end of this document. Source: EAM Investors, MSCI.

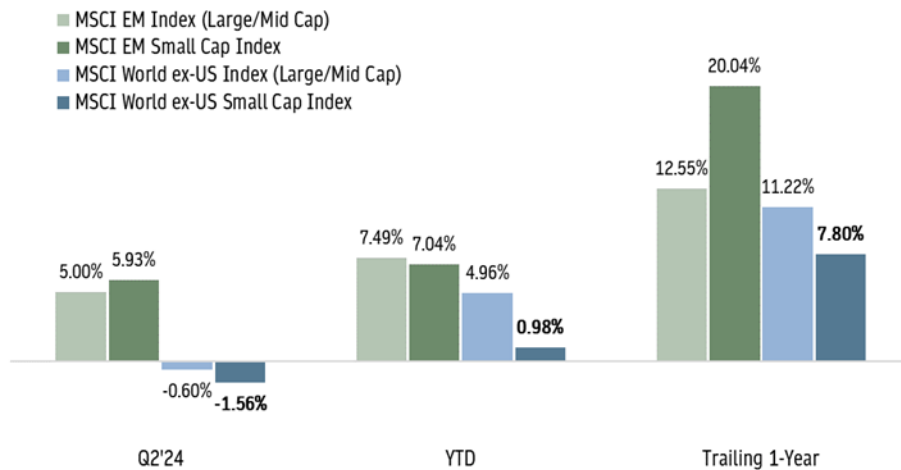

The EAM Emerging Markets Small Cap strategy gained 8.97% (net of fees) in Q2, outperforming the MSCI EM Small Cap Index by 304 basis points. Risk attribution shows Informed Momentum (momentum exposure & stock selection) drove the strategy's outperformance in the quarter.

Market Environment

Global equity markets had mixed performance in the second quarter of 2024. While interest rate uncertainty continued to weigh on developed markets, emerging markets made strong gains in Q2.

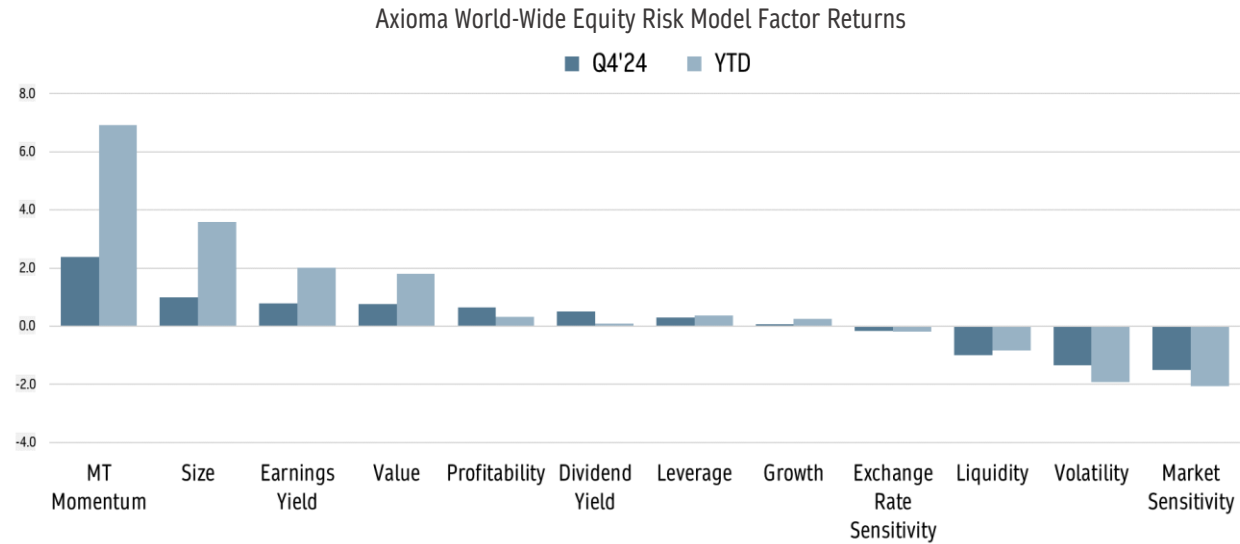

Developed markets came under pressure in the quarter as investors reassessed the timeframe for interest rate cuts in the US and Europe. Small cap was disproportionately impacted at the prospects of 'higher for longer' interest rates. In emerging markets, strength in the quarter was supported by technology-heavy Taiwan, a rebound in China, as well as continued strength in India, which was the top contributor in small cap. The MSCI Emerging Markets Small Cap Index finished the quarter up 5.93%, just ahead of its large/mid cap counterpart. For the trailing 1-year period, emerging markets small cap has been one of the best performing asset classes in global equity markets driven by strength in India, Taiwan and Korea.

Emerging markets were a bright spot in Q2, particularly small cap

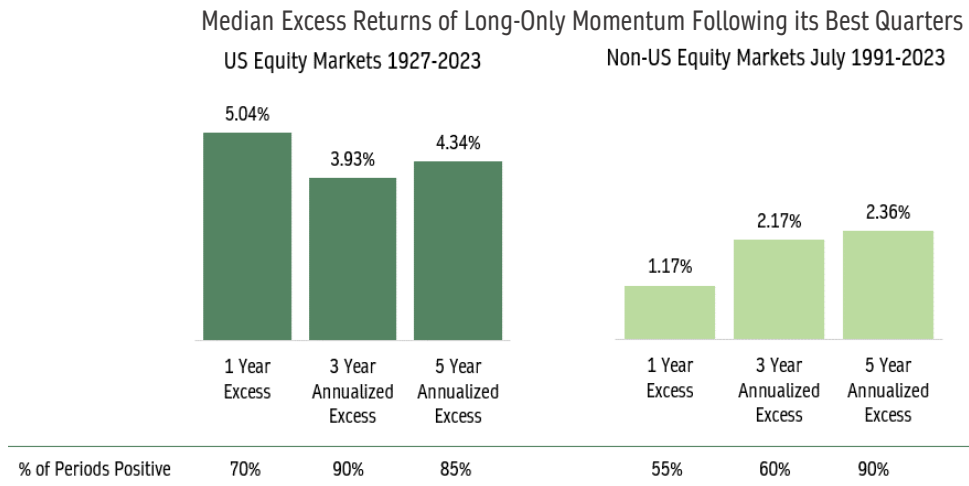

From a factor perspective, momentum, size and earnings yield were the leading factors in global equity markets in Q2, while market sensitivity, volatility and liquidity underperformed. After soft performance to end 2023, momentum has made a comeback in the first half of 2024 as the best performing factor in global equity markets. Size, earnings yield and value have also outperformed year-to-date, while market sensitivity (beta) and volatility have been the standouts on the downside.

Momentum and size were the best performing factors in Q2

Notably, strong performance doesn't necessarily mean bad news is in store for momentum. Looking at the twenty best quarters in history for long-only momentum, momentum has outperformed in the subsequent 1-, 3-, and 5-year periods more often than not in both US and Non-US equity markets.

Momentum outperforms more often than not following quarters of strong performance

Source: Fama-French Data Library https://mba.tuck.dartmouth.edu/pages/faculty/ken.french/data_library.html
Returns are excess to the market portfolio in each respective US and Non-US market for the full history available.

Within the MSCI Emerging Markets Small Cap Index, the highest momentum stocks were the best performers in Q2, up 12.2%, outperforming the lowest quintile momentum stocks by over 13 percentage points. Additionally, lower beta, higher ROE stocks outperformed in linear fashion. Only the lowest momentum quintile stocks posted declines in the quarter.

MSCI EM Small Cap Index: The highest momentum stocks were the best performers in Q2

Q2 2024 Performance Drivers within the MSCI Emerging Markets Small Cap Index

At a country level, India was a standout performer in Q2, up 19.5% in the emerging market small cap index, helped by political developments and broadening market participation. Taiwan was also a top contributor in Q2, gaining 6.1%, as investor enthusiasm continued for AI-related technology stocks. South Africa and Malaysia also posted double-digit gains in the quarter. On the other side, Brazil declined 17.2% in the quarter, as disastrous flooding prompted investor concern over economic growth and inflation.

MSCI EM Small Cap Index: India was the standout performer in Q2

EAM Emerging Markets Small Cap: 2nd Quarter Performance & Risk Attribution

The EAM Emerging Markets Small Cap strategy gained 8.97% (net of fees) in Q2, outperforming the MSCI EM Small Cap Index by 304 basis points.

Risk attribution shows Informed Momentum (momentum exposure & stock selection) drove the strategy's outperformance in the quarter. From a factor perspective, exposure to momentum contributed most, as momentum was the best performing style factor in the quarter. The strategy further benefitted from relative country positioning (overweight to India), while exposure to volatility and relative currency positioning (in Turkey and Taiwan) detracted.

Performance attribution by country shows stock selection was most additive in Q2, particularly in Korea, India and Poland. Allocation effects further added value, driven by the strategy's overweight to India. On the other side, stock selection in Taiwan detracted in the quarter.

EAM Small Cap

The inception date for the EAM Small Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell 2000 Index consists of the smallest 2,000 securities in the Russell 3000 Index, representing approximately 10% of the Russell 3000 total market capitalization. The Russell 2000 Value Index (R2KVI) measures the performance of those Russell 2000 companies with relatively lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Index and the Russell 2000 Value Index are being presented for informational purposes only. The Russell 2000 Growth Index (R2KGI) measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2000 Growth Index has been chosen as a benchmark to the EAM Small Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

EAM Micro Cap

The inception date for the EAM Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Growth Index has been chosen as a benchmark to the EAM Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

EAM Ultra Micro Cap

The inception date for the EAM Ultra Micro Cap composite is October 2, 2007. Net returns are net of the maximum annual management fee of 0.50%. The Russell Microcap Index consists of the smallest 1,000 companies in the small-cap Russell 2000 Index plus the next 1,000 securities. The Russell Microcap Value Index measures the performance of those Russell Microcap companies with lower price-to-book ratios and lower forecasted growth values. The Russell Microcap Index and the Russell Microcap Value Index are being presented for informational purposes only. The Russell Microcap Growth Index (RMGI) measures the performance of those Russell Microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Growth Index has been chosen as a benchmark to the EAM Micro Cap composite because the Advisor believes that it is the most appropriate broad-based securities index to be used for comparative purposes given the investment growth-oriented strategy of the portfolio.

EAM US Mid Cap

The inception date for the EAM US Mid Cap representative account is April 1, 2019. Net returns are net of the maximum annual management fee of 0.35%. The Russell Mid-Cap Index is a subset of the Russell 1000 Index and is designed to measure the performance of the mid-cap segment of the US equity universe. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Mid-Cap Growth Index measures the performance of those Russell mid-cap companies with higher price-to-book ratios and higher I/B/E/S forecasted medium term (2 year) growth and higher sales per share historical growth (5 year). The Russell Mid-Cap Value Index measures the performance of those Russell Mid-Cap companies with lower price-to-book ratios, lower I/B/E/S forecast medium term (2 year) growth and lower sales per share historical growth (5 years). The Russell Mid-Cap Index has been chosen as a benchmark to the EAM Mid Cap representative account because the Advisor believes that it is the most appropriate broad-based securities index to be used for a comparative purposes given the strategy of the portfolio.

EAM Non-US Small Cap

The inception date for the EAM Non-US Small Cap composite is May 1, 2011. Net returns are net of the maximum annual management fee of 0.50%. The MSCI ACWI ex-US Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets excluding the United States. The MSCI ACWI ex-US Small Cap Index has been chosen as a benchmark to the EAM Non-US Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI ex-US Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 22 of 23 DM countries (excluding the US) and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI ex-US Small Cap Growth Index and the MSCI ACWI ex-US Small Cap Value Index are being presented for informational purposes only.

EAM Emerging Markets Small Cap

The inception date for the EAM Emerging Markets Small Cap composite is April 1, 2012. Net returns are net of the maximum annual management fee of 0.50%. The MSCI Emerging Markets Small Cap Index includes small cap representation across 25 Emerging Markets countries (EM) and is designed to measure small cap equity market performance in the global emerging markets. The MSCI Emerging Markets Small Cap Index has been chosen as a benchmark to the EAM Emerging Markets Small Cap strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI Emerging Markets Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics across 25 EM countries. The MSCI Emerging Markets Value Index captures small cap securities exhibiting value style characteristics across 25 EM countries. The MSCI Emerging Markets Small Cap Growth Index and the MSCI Emerging Markets Small Cap Value Index are being presented for informational purposes only.

EAM Non-US Micro Cap

The inception date for the EAM Non-US Micro Cap composite is June 1, 2014. Net returns are net of the maximum annual management fee of 0.50%. The Linked Global ex-US Micro Cap Index represents the linked index returns of the Russell Global ex-US Micro Cap Index from June 1, 2014 through December 31, 2018 and the index returns of the FTSE Global ex-US Micro Cap Index effective January 1, 2019 and thereafter. The Russell Global ex-US Micro Cap Index was no longer supported effective December 31, 2018 and the FTSE Global ex-US Micro Cap Index is initiated effective January 1, 2019. The Adviser has linked the returns of these two indexes for comparison purposes because it believes that the linked return stream is the most appropriate broad-based securities indexing available to be used for comparative purposes given the investment strategy of the EAM Non-US Micro Cap Composite. The FTSE Global ex-US Micro Cap Index is a market-capitalization weighted index representing the performance of Micro cap stocks in Developed and Emerging markets (excluding the US). The FTSE Global ex-US Micro Cap index is constructed to represent the Micro-cap segment of the global equity market, excluding companies assigned to the United States.

EAM Global Opportunities

The inception date for the EAM Global Opportunities composite is July 1, 2017. Net returns are net of the maximum annual management fee of 0.50% for the EAM Global Opportunities Strategy. The MSCI ACWI Small Cap Index captures small cap representation across 23 Developed Markets (DM) countries and 25 Emerging Markets (EM) countries. The index is designed to measure small cap equity market performance in the global developed and emerging markets. The MSCI ACWI Small Cap Index has been chosen as a benchmark to the EAM Global Opportunities strategy because the Advisor believes that it is the most appropriate broad-based securities index available to be used for comparative purposes given the investment strategy of the portfolios. The MSCI ACWI Small Cap Growth Index captures small-cap securities exhibiting overall growth style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI Small Cap Value Index captures small cap securities exhibiting overall value style characteristics across 23 DM countries and 25 EM countries. The MSCI ACWI Small Cap Value Index and the MSCI ACWI Small Cap Growth Index are being presented for informational purposes only.

EAM Global Discovery

The inception date for the EAM Global Discovery composite is February 1, 2018. Net returns are net of the maximum annual management fee of 0.50%. The strategy's benchmark represents the linked index returns of the Russell Global Small Cap Index from February 1, 2018 through December 31, 2018, and the index returns of the FTSE Global Micro Cap Index effective January 1, 2019 and thereafter. The Russell Global Small Cap Index was no longer supported effective December 31, 2018 and the FTSE Global Micro Cap Index is initiated effective January 1, 2019. The Adviser has linked the returns of these two indexes for comparison purposes because it believes that the linked return stream is the most appropriate broad-based securities indexing available to be used for comparative purposes given the investment strategy of the EAM Global Discovery Composite. The FTSE Global Micro Cap Index is a market-capitalization weighted index representing the performance of Micro cap stocks in Developed and Emerging markets. The FTSE Global Micro Cap index is constructed to represent the Micro Cap segment of the global equity market.

The performance of the Indexes reflects dividends net of foreign tax withholdings applicable to a typical foreign investor and capital gains but does not reflect the deduction of any investment management fees or other expenses or taxes. The indexes are unmanaged and cannot be invested in directly.

Under no circumstances does the information contained within represent a recommendation to buy or sell securities. The securities identified in the materials are used for illustrative purposes in the discussion of our investment philosophy and processes. We may or may not have held, currently hold, or will hold any of the securities.

The portfolio(s) are actively managed and holdings are subject to change. We believe the information presented is reliable, but we do not guarantee its accuracy. The opinions expressed will evolve as future events unfold. The investment risk of the portfolio(s) may be increased by the portfolios' ability to invest in smaller company stocks, and IPOs. Investing in growth stocks involves certain risks, in part, because the value of securities is based upon future expectations that may or may not be met. Small company stocks are generally riskier than large company stocks due to greater volatility and less liquidity.
